

### MEASURE EXISTING FRENCH DOOR OPENING

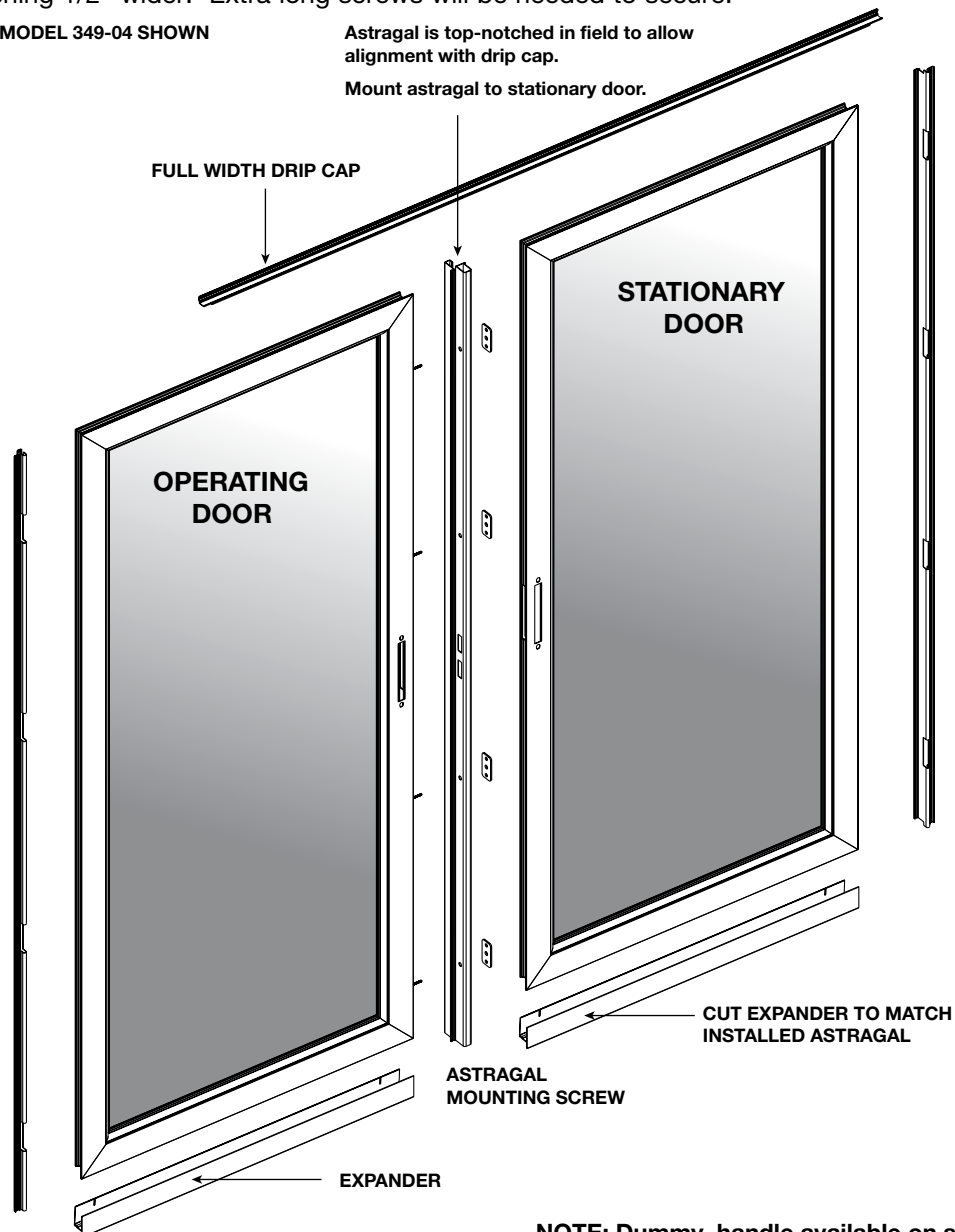

1. Measure full width of opening from jamb exterior trim where storm doors will attach to the trim.
2. Measure full height of opening from head exterior trim to threshold where storm doors will attach.
3. Compare your dimensions with the standard French storm door opening size guide. If your opening does not match a standard, you need custom French doors.

**Note:** Continuous wood shims up to 1/4" thick can be installed behind both Z-bars allowing a given width of standard doors to fit an opening 1/2" wider. Extra long screws will be needed to secure.

MODEL 349-04 SHOWN

Astragal is top-notched in field to allow alignment with drip cap.
