DuraCast™ Fiberglass Columns

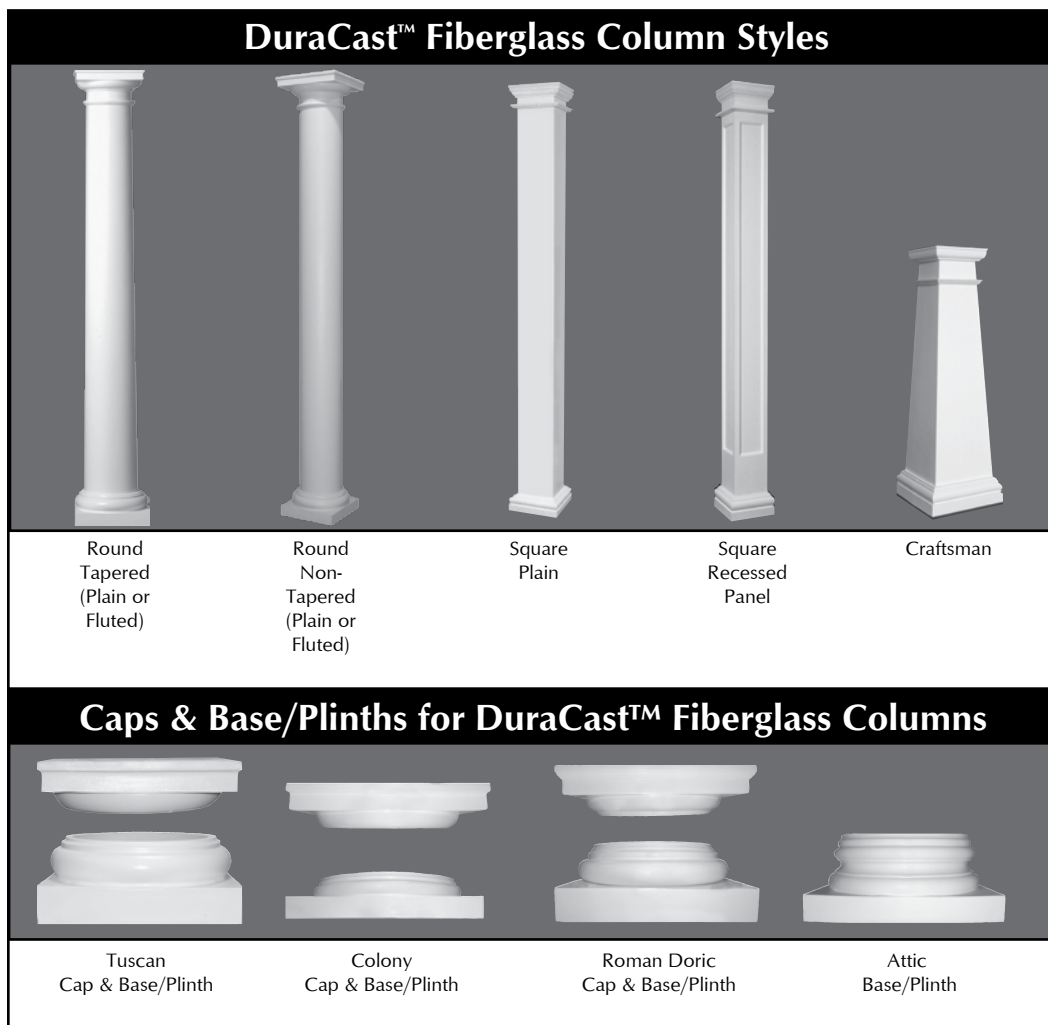

DuraCast™ Columns Quick Facts

Key Features:

- Round or Square
- Architecturally Correct Proportions
- Plain or Fluted Shaft
- Durable
- Low Maintenance
- Decay Resistant
- Load Bearing
- Decorative Capitals Available
- Limited Lifetime Warranty

About DuraCast™ Columns:

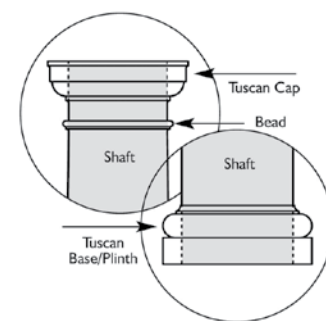

- DuraCast™ Fiberglass Columns are manufactured using a spun cast technology and are composed of Fiberglass Reinforced Polymers (FRP).
- Available in the following designs: Round or Square; Tapered or Non-Tapered; Plain or Fluted.
- The DuraCast™ Fiberglass Column Shaft runs floor to ceiling and the cap and base/plinth slide around the shaft. (Example: An 8" x 8' Fiberglass Column Shaft measures 8') See Illustration 1.
- All Cap and Base/Plinth sets as well as Decorative Capitals are sold separately from the column shaft.
- DuraCast™ Fiberglass Columns are load bearing provided that they are not split.
- DuraCast™ Fiberglass Columns can be cut to any overall length. Unless using an ornamental capital always cut from the bottom end of the shaft.
- DuraCast™ Round Tapered Fiberglass Columns have a true architectural taper. The bottom 1/3 is non-tapered and the top 2/3 is tapered. Cutting in the taper will require a base modification.
- DuraCast™ Round Tapered Fiberglass Columns used with Decorative Capitals must be "cut at the bead" in order for the Decorative Capital to fit properly.

Options & Ordering Tips:

- Tuscan Cap and Base/Plinths are the standard components for DuraCast™ Fiberglass Columns. Additional styles are also available and are sold separately (See pages 10-11).
- All Caps and Base/Plinths for DuraCast™ Fiberglass Columns are non-vented.
- Numerous sizes and styles of Decorative Capitals are available for DuraCast™ Fiberglass Columns and are sold separately (See pages 12-13).
- DuraCast™ Round Tapered Small Stock Fiberglass Columns (6" x 8' - 12" x 12'; 14" x 8' - 14" x 10') are boxed individually and collared. Caps and base/plinths are boxed separately from the column shaft in a cap and base/plinth set box.
- DuraCast™ Round Tapered Large Fiberglass Columns (12" x 14', 12" x 16' and all sizes above 14" x 10') are crated (Price includes crating). Caps and base/plinths are boxed separately from the column shaft in a cap and base/plinth set box.
- Available in a Plain or Fluted Round Shaft (certain styles). DuraCast™ Round Fluted Fiberglass Columns can also be ordered with adjustable flutes.
- DuraCast™ Fiberglass Columns can be split in half for reassembly, pilaster application, or a variety of other plan types.

NOTE:

- When ordering adjustable Fluted Columns please add the product's two letter notation (AF) to the item number.
- AF = Adjustable Flute Shaft (Adjustable flute length for 6" x 8' - 30" x 30').
- Flutes can be adjusted to stop any distance from the top of the base.
- Add 60% List to alter Flutes on all Round DuraCast™ Shafts.

Plan Types for Split Decorative Columns

Decorative Capitals Quick Facts

Key Features:

- 12 Styles and Numerous Sizes Available
- Decay Resistant
- Hand Crafted with Precise Detail
- Manufactured from Lightweight Polyurethane
 - 6" - 12" are Load-Bearing
 - 14" - 30" Require Load-Bearing Plug
- Limited Lifetime Warranty

About Decorative Capitals:

- All Decorative Capitals are manufactured from lightweight polyurethane.
- Available for the following Columns: DuraCast™
- 6" - 12" are load-bearing, 14" - 30" are non-load bearing and require plug.
- All DuraCast™ Round Tapered Fiberglass Columns and Columns used with Decorative Capitals must be "cut at bead" in order for the Decorative Capital to fit properly.

Options and Ordering Tips:

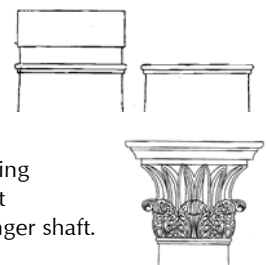

- There are several considerations to be made when ordering round columns used with Decorative Capitals. The "cut at bead" loss and the Decorative Capital height must always be taken into consideration (See "Cut at Bead" Loss Chart). Additionally, a column used with a short Decorative Capital may require that a longer shaft be ordered.
- Decorative Capitals can be split in half for reassembly, pilaster application or a variety of other plan types. Capitals can be split in the field or ordered split from the factory. Please note: due to the height of some of the Decorative Capitals, it is not recommended to split the Capital in the field.

Cutting Columns at Bead/Astragal

A All DuraCast™ Round Columns should be cut flush above the bead.

B The Decorative Capital should rest on the top of the bead to allow for the proper fit on the column.

The "cut at bead" loss and the Decorative Capital height must be taken into consideration when ordering columns. A column used with a short Decorative Capital may require a longer shaft.

Split charge for ornamental capitals: add 20% to list price

*Necking detail may vary.

NOTE:

- 6" - 12" Decorative Capitals are load bearing (unless split) and manufactured from lightweight polyurethane.
- 14" - 30" Decorative Capitals are non-load bearing (requires plug) and manufactured from lightweight polyurethane.
- Specify size and shape of structural support if Decorative Capitals are split for reassembly. The inside diameter of the Decorative Capital is significantly smaller than the inside top diameter of the column shaft.
- All Decorative Capitals are sold separately from the column.

DuraCast™ Fiberglass Columns

Bead is adjustable and is applied in the field. Bead sold separately

NOTE:

- When ordering adjustable Fluted Columns please add the two letter notation (AF) to the item number.
- AF = Adjustable Flute Shaft (Adjustable flute length for 8" x 6' - 24" x 30'). Flutes can be adjusted to stop any distance from the top of the base.

NOTE: Beads are sold separately. See page 15 for pricing.

*Add 60% List to alter flutes on all Round DuraCast™ shafts.

Features

- Limited Lifetime Warranty.
- DuraCast™ columns are cast from fiber reinforced polymers
- Weatherproof
- Insect proof
- Virtually maintenance free
- Load bearing
- Will never rot like wood columns
- Has many interior uses

What You Need To Know

- A complete column consists of shaft, neck moulding, cap, and base.
- Cap and base slide over shaft. The shaft rests on floor.
- Neck moulding is included with each column and must be applied.
- DuraCast™ columns used outside should not be painted using dark colors.
- For transportation purposes, small sections of split columns are left partially intact.
- Split columns are not load bearing.
- Pre-drill column prior to installing screws.
- Automotive body filler works great for minor repairs.
- When ordering a cap and base set, the Tuscan model is shipped unless otherwise specified.

DuraCast™ Square Panel and Neck Moulding

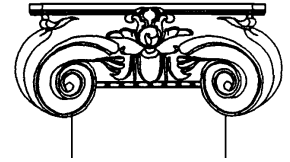

Special Neck Mould Instructions for Scamozzi, Greek Ionic, and Roman Ionic Capitals for Square DuraCast™ Columns

Omitting neck mould - Because of the beaded rim at the base of these capitals, they may be installed without neck mould. The beaded edge serves the same purpose aesthetically as a neck mould. Standard installation instructions for capitals should be followed, omitting references to neck mould.

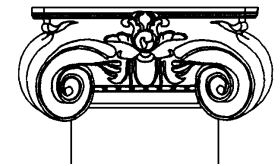

Using neck mould - If neck mould is to be used, it should be coped to fit around the scrolls of the capital. See appropriate illustration below.

Without Neck Mould -SCAMOZZI-

With Neck Mould -SCAMOZZI-

• Split charge for ornamental capitals: add 20% to list price

Ornamental Capitals for SQUARE DuraCast™ Columns

Adding an ornamental capital to a square DuraCast™ column DOES NOT change the length of the column shaft. The ornamental capital simply slides over the shaft. Neck moulding can be applied or not.

Features

- Molded from polyurethane resin
- Lightweight for easy installation
- Weather, rot, and bug-proof

What You Need To Know

- Adding an ornamental capital to a square DuraCast™ column does not change the length of the column shaft.

Square Non-Tapered Recessed Panel (3)

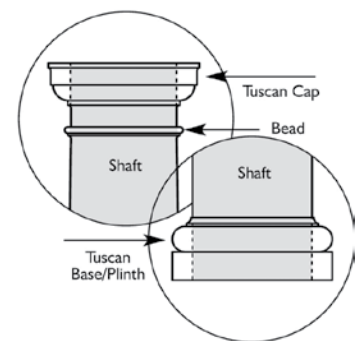

About DuraLite® Columns:

- DuraLite® Fiberglass Columns are manufactured using a pultrusion technology and are composed of Fiberglass Reinforced Polymers (FRP).
- Available in the following designs: Square, Square Recessed Panel, or Round Non-Tapered.
- The DuraLite® Fiberglass Column Shaft runs floor to ceiling and the cap, bead, and base/plinth slide around the shaft. (Example: An 8" x 8" x 8' Fiberglass Column Shaft measures 8'). See Illustration 1
- All Cap and Base/Plinth sets are sold separately from the column shaft.
- DuraLite® Fiberglass Columns are load bearing provided that they are not split.
- All DuraLite® Fiberglass Columns can be cut to any overall length. They can be cut from the bottom or top since the shafts are non-tapered. DuraLite™ Recessed Panel columns are adjustable and can be cut to any overall length.
- DuraLite® Recessed Panel Fiberglass Columns include a top panel insert piece and a bottom panel insert piece that must be attached to the column shaft on each side. Each boxed column will include a total of 4 top panel insert pieces and 4 bottom panel insert pieces.

Options and Ordering Tips:

- Tuscan Cap and Base/Plinths are the standard components for DuraLite® Fiberglass Columns and are sold separately. Additional styles are also available. All Caps and Base/Plinths for DuraLite® Fiberglass Columns are non-vented.
- DuraLite® Fiberglass Columns are boxed individually. Caps and Base/Plinths are boxed separately from the column shaft in a cap and base/plinth set box.
- Available in a Plain or Recessed Panel Shaft.
- For DuraLite® Recessed Panel Columns, additional panel divider pieces can be purchased separately in a Panel Divider Kit to achieve a 2-panel or a 3-panel column. One Panel Divider Kit is needed to achieve a 2-panel column and two Panel Divider Kits are needed to achieve a 3-panel column.

* Can not use with fluted or paneled square columns. Order a custom column and designate adjusted flute and panel dimensions.

- Polyurethane Caps and bases must be split: add 20% to list price.
- Adding an ornamental capital to a square column DOES NOT change the length of the column shaft. The ornamental capital simply slides over the shaft. Neck moulding can be applied or not.

Architectural Wood Columns

All architectural wood columns are custom, made to order. Each wood column is formed of nominal 4" wide staves and interlocked together with a tongue and groove stave construction. The staves are glued with the highest quality Type 1 water-resistant glue and kept under pressure for a minimum of eighteen hours to ensure a proper adhesion. Unless specified otherwise all architectural wood columns have a true architectural taper. The bottom one third of the shaft is straight and the top two thirds of the shaft is tapered. All diameters or widths are actual (not nominal) and all overall lengths are manufactured to your exact specified requirements.

It is recommended to use western red cedar or redwood for exterior applications. These species are naturally weather resistant and immune to decay and insect infestation. Pine or poplar may be used for interior use. We also offer a large selection of stain grade columns. Mahogany, maple, oak, and cherry are the most common species; however, other stain grade wood species as well as exotic hardwoods are also available. All columns used for exterior use have an interior asphalt coating applied to the inside of the shaft. Columns that are to be painted are primed with two to three coats of primer after they are turned and then sanded in between each coat of primer to provide an excellent surface for your topcoat.

Columns may be plain or fluted with the flutes being either Ionic or Doric design. Since all architectural wood columns are custom, we can manufacture the shafts, caps, and bases to your exact specifications. Whether you are looking for an exact overall length or a specific diameter, we can manufacture exactly what you are looking for. A large selection of caps and bases are available to complement any design. Choose from Tuscan, Greek Doric, Roman Doric, or Attic to name a few. If you are looking for something more ornate, we have a complete line of ornamental capitals to crown the top of your column while adding a stylish flourish. Columns may serve as a structural support or merely as a decorative accent. They are available in round or square and can be split to the following plan types:

Splitting Options

Quoting Requirements:

- 1.) Quantity required
- 2.) Design (Tuscan, Roman Ionic, Greek Doric, Roman Doric, or Custom)
- 3.) Plan type
- 4.) Bottom diameter/width and overall length
- 5.) Exterior or interior application
- 6.) Stain Grade or Paint Grade
- 7.) Wood species
- 8.) Plain or fluted. If fluted, Ionic flute, or Doric flute?
- 9.) If columns are split for reassembly, specify shape and size of structural support
- 10.) Will columns match an existing column?

*Primed

- Additional sizes available, call for quote.
- Call for quote on all custom architectural wood products.

Features

- 1 year warranty
- Stock pine columns are manufactured using paint-grade, finger-jointed pine.
- Wood columns can be painted any color.
- Round Wood columns are load bearing.

For individual cap and base pricing, refer to pages 31 and 32.

What You Need To Know

- A complete column consists of shaft, cap, and base.
- Cap and base fit on top and bottom of column insulating the column from the elements.
- Split columns are not load bearing.
- For transportation purposes, small sections of split columns are left partially intact.
- High quality exterior oil based primer and top coats must be used.
- Storage of columns must be in a dry, well-ventilated area.
- For exterior applications: Coat inside of column shaft with a nonfibrous asphaltum-type roof coating. Application must reach a minimum 48" up the inside bottom of the column shaft.
- Wood columns require ventilation at the top and bottom. Please refer to installation instructions.
- Failure to adhere to installation instructions voids the warranty.
- Custom fluting available.
- When ordering a cap and base set, the Standard model is shipped unless otherwise specified.

Load Bearing Ornamental Capitals for ROUND Wood Columns

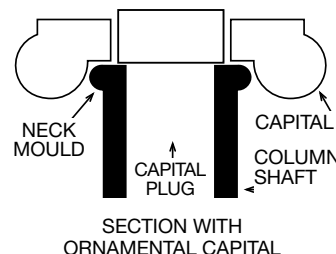

Adding a load bearing ornamental capital to a round wood column will lengthen or shorten the overall height of the column depending on the height of the capital. Subtract the cut at bead dimension (from the dimensions chart in the products brochure) and add the height of the ornamental capital +/- 1/4" for overall column height.

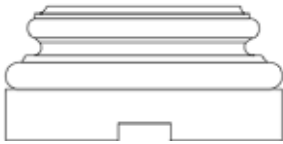

6", 14" - 30"

Ornamental Capitals for ROUND Wood Columns

Adding an ornamental capital to a round or square wood column will lengthen or shorten the overall height of the column depending on the height of the capital. Subtract the cut at bead dimension (from dimension chart in the products brochure) and add the height of the ornamental capital +/- 1/4" for overall column height.

Wood Porch Posts

Wood Porch Posts Quick Facts

Key Features:

- Manufactured From Finger-Jointed Pine
- Load Bearing
- One Year Limited Warranty

About Wood Porch Posts:

- Wood Porch Posts are manufactured from Paint-Grade, finger-jointed pine and laminated.
- Aluminum Plinths are sold separately from the Wood Porch Posts.
- Wood Porch Posts are load bearing provided that they are not split.
- Wood Porch Posts must be stored, primed and painted according to manufacturer's instructions for the one year limited warranty to be valid. Aluminum Plinths MUST be used for all exterior applications

Options:

- Aluminum Plinths available (sold separately).
- Wood Porch Posts can be split in half for pilaster application. Split posts are non load-bearing.

Ordering Tips:

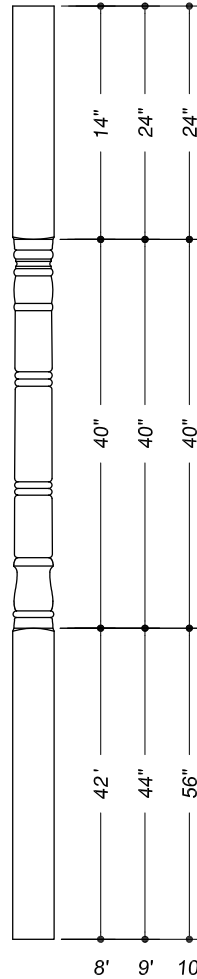

- Aluminum Plinths are sold separately from the Wood Porch Posts.

Balustrade Quick Facts

Key Features:

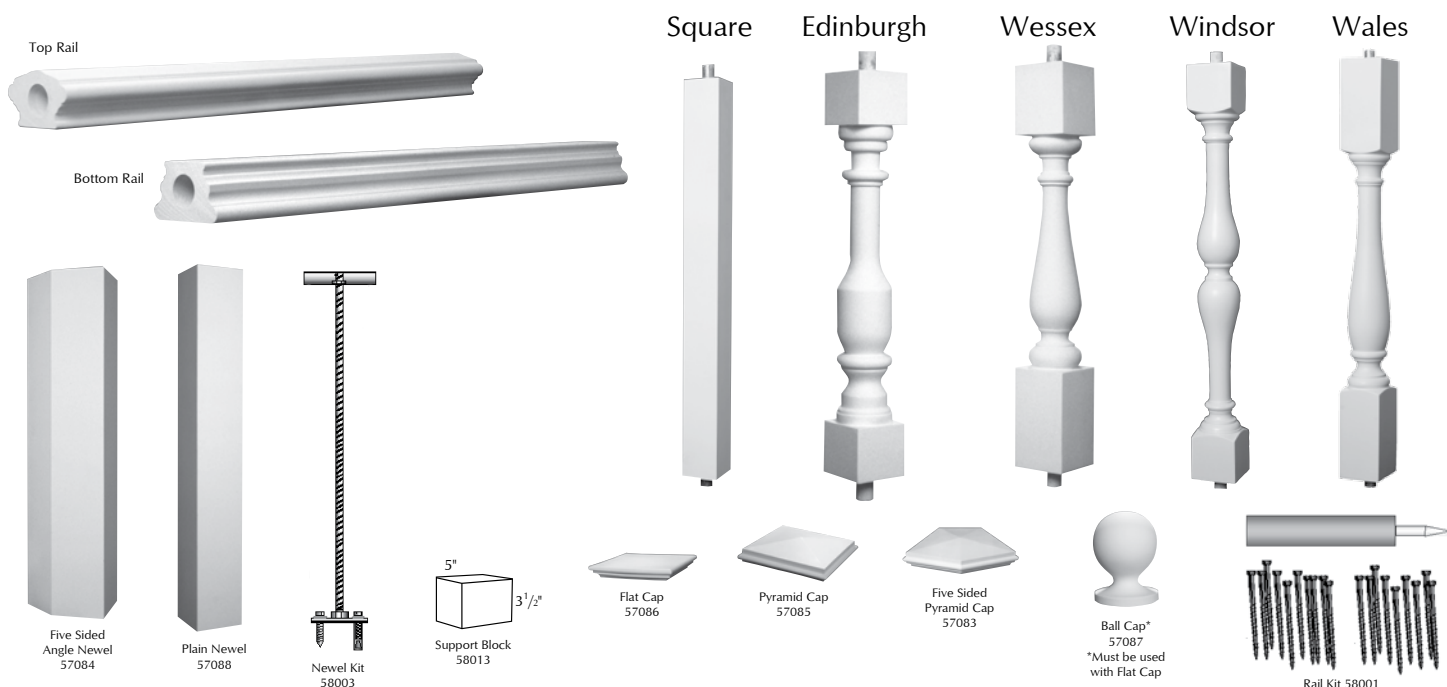

- Manufactured From High-Density Polyurethane
- Low Maintenance
- Durable
- Decay Resistant
- Primed White (Ready to Paint)
- Easy to Install
- Curved Radius Rail Styles Available
- 25 Year Limited Warranty

About Balustrade Systems:

- Balustrade systems are manufactured from a high-density polyurethane and primed white (ready to paint).
- The space between the bottom rail and substrate should not be more than 2".

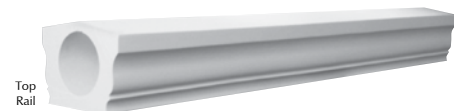

Options & Ordering Tips:

- One rail hardware kit is required per each top and bottom rail section.
- When ordering a ball top, also order a flat cap for proper installation.
- All components are sold separately (Top Rail, Bottom Rail, Balusters, Caps, Tops, Newels, Support Blocks, Rail Kits, and Newel Kits).

Terms and Conditions

Acceptance of Orders

All orders will be accepted subject to our ability to furnish all products and may be revoked after acceptance due to conditions beyond our control. Possession of the Dixie price list or catalog is not to be construed as an offer to sell the goods therein.

Order Entry

In order to help us better serve you, we ask that all orders be placed using both the description and the Dixie Stock Keeping Unit (SKU) number.

Order Changes and Cancellations

Changes or cancellations must be communicated in writing by facsimile, letter, or e-mail only. Cancellations of orders for stock merchandise that have been loaded and or shipped must be considered as returned merchandise. Once production has started, special orders can not be cancelled.

Payment Terms

Net invoice amount is due thirty (30) days from the invoice date.

Drop Shipments

The minimum net \$ drop shipment order that can be included in a Dixie pool truck is \$3,000.00 in shipping zone #1; \$3,500.00 in zone #2; and \$7,000.00 in zone #3, plus they will incur a Drop Charge of \$100.00. Note: Drop charges may be higher in some distant areas.

Job Site Deliveries

The minimum net \$ job site shipment that can be included in a Dixie pool truck is \$3,000.00 in shipping zone #1, \$3,500.00 in zone #2, and \$7,000.00 in zone #3, plus they will incur a job site delivery charge of \$250.00. A "Job Site Delivery Check List" must be completed prior to the loading of the truck. Note: Delivery charges may be higher in some distant areas.

Shipments and Claims

Our Dixie pool truck responsibility terminates upon delivery of goods to the buyer's designated place of delivery and receipt by us of a clear signed receipt that goods were examined and found to be in good condition.

Goods delivered by common carrier are F.O.B. Troy Alabama, and are the property of the consignee at the moment the truck leaves the dock. Freight charges will be prepaid and added to the invoice. The buyer must file any claims with the delivering carrier. A packaging, crating or palletizing charge of 10% of the net value of the product or a minimum charge of \$15.00 will be added to all products to help protect them. Dixie offers no guarantee that the product will arrive undamaged.

FedEx/Motor Freight

A handling charge of 10% of the net value of the product or a minimum of \$5.00 will be added.

Returned Merchandise Authorization (RMA)

- Only current made-to-stock items that are reported to be in saleable condition and purchased within the last 120 days will be accepted.
- All returned merchandise will be inspected and appropriate action will be taken to put the product into a saleable condition.
- Repair and repackaging charges will be deducted along with a minimum 35% restocking fee.
- All returns must be made within 30 days of the RMA date.
- Returned merchandise shipment must be prepaid. Collect shipments will be refused.

Order Minimums

The minimum net \$ order that can be included in a Dixie pool truck shipment to a distributor is:

Zone 1 \$3,000.00
Zone 2 \$3,500.00
Zone 3 \$7,000.00

HB&G and Dixie Pacific extend the following Limited Warranty (the “Warranty”) to “original purchasers” of its materials and components (the “Product”). An “Original Purchaser” is a retailer, distributor, builder, or supplier that purchases the Product or the first individual homeowner who purchases the Product from a retailer, distributor, builder, or supplier, whether or not the Product has been installed. This Warranty is not transferable to subsequent homeowners. HB&G and Dixie Pacific warrant that the Product, when properly installed, shall be free of manufacturing defects in workmanship and materials under conditions of normal use and service. If the Product fails to perform as warranted during the associated time periods listed below for each particular Product as a result of defective material or workmanship and meets the criteria laid forth in this Warranty, HB&G and Dixie Pacific will provide replacement parts of those materials that it deems defective after its review. Installation and labor costs are NOT covered under this Warranty. Non-factory-applied finishes are NOT covered under this Warranty. Original Purchasers must look to the warranty or warranties, if any, of the paint manufacturer associated with the paint applied to the Product for recourse as to defects or any other issue concerning applied finishes.

Limited Warranty Time Periods:

- PermaCast®, PermaLite®, DuraCast™, DuraLite® – Limited Lifetime
- Builders Select and Duralast Railing – Limited Lifetime
- Aluminum Columns – Limited Lifetime Component – 1 Year Color Fade
- Vinyl Post Wrap – Limited Lifetime
- PermaWrap® – 25 Year
- cPVC Pergola – 25 Year
- Fiberglass Pergola – Limited Lifetime
- PermaPost® – 25 Year
- Wrap N’ Snap Column Wrap® -25 Year
- PermaPorch® Railing – 25 Year Component – 10 Year Color Fade
- PermaPorch® Ceiling – 25 Year Component – 10 Year Color Fade
- Balustrade – 25 Year
- Brackets & Medallions – 10 Year
- Wood Columns – 1 Year
- Wood Turned Post – 1 Year

General Conditions & Exclusions:

This Warranty is not transferable and is subject to the following general conditions and exclusions:

HB&G and Dixie Pacific Warranty Information

What is not covered:

There are certain conditions or applications over which HB&G and Dixie Pacific have no control. This Warranty does not cover defects or problems as a result of such conditions or applications, including but not limited to the following:

- Damage caused by improper installation, use, applications, or maintenance.
- Damage caused by environmental conditions or use that exceeds design standards.
- Damage caused by accidents, Acts of God, abuse, vandalism, animal activity, or any other external force.
- Damage resulting from mishandling in transit.
- Damages resulting from the failure to apply a finish to any purchased, unfinished Product.
- Damages caused by lack of routine maintenance, including but not limited to painting the product as needed.
- Modifications to the column, such as splitting the column, by anyone, including but not limited to a retailer, distributor, builder, or supplier.
- Normal weathering, chalking, fading, mildew buildup, or the effects of atmospheric pollutants.
- Non-Factory Applied finishes, applied sealants, or caulking.
- Installation or labor costs.
- Improper Installation, including but not limited to Installation in violation of building codes.
- Any product not manufactured by HB&G or Dixie Pacific.
- Damage or distortion to the Product caused by twisting, bowing, or other movement of the structure to which the Product is attached.
- Color matching of the Product material and any other HB&G or Dixie Pacific Material.

HB&G and Dixie Pacific make no other express warranties, oral, or written. By purchasing or using the Product, you agree that you are not relying on any oral statements made by anyone that are in any way contrary to this Warranty. HB&G and Dixie Pacific liability shall be limited in all instances to the remedy provided above; that is, the remedy stated above is your sole and exclusive remedy. HB&G and Dixie Pacific shall not be responsible for incidental or consequential damages relating to your purchase or use of the Product.

Statute of Limitations:

No action arising out of any claimed breach of this agreement by seller may be brought by buyer more than Ninety (90) Days after the cause of action has arisen.

Rights May Vary By State:

This warranty gives you specific legal rights and you may have other rights which vary from state to state. Some states do not allow the exclusions or limitations of incidental or consequential damages so the above limitations or exclusions may not apply to you.

This warranty is only applicable in the United States & Canada.
